

1) Structures of File Systems with type & size of file :

1) Scaffold Tree :

Scaffold tree showing the folders inside This PC's folders.

2) Treemap with Priorities :

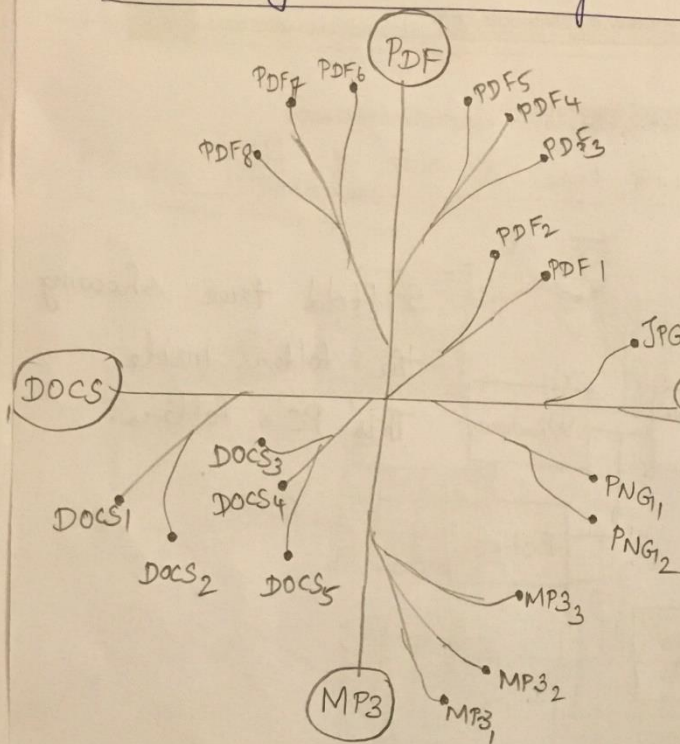

Treemap design showing the view of the file system with the shaded area having large & small size of files.

Large sized files

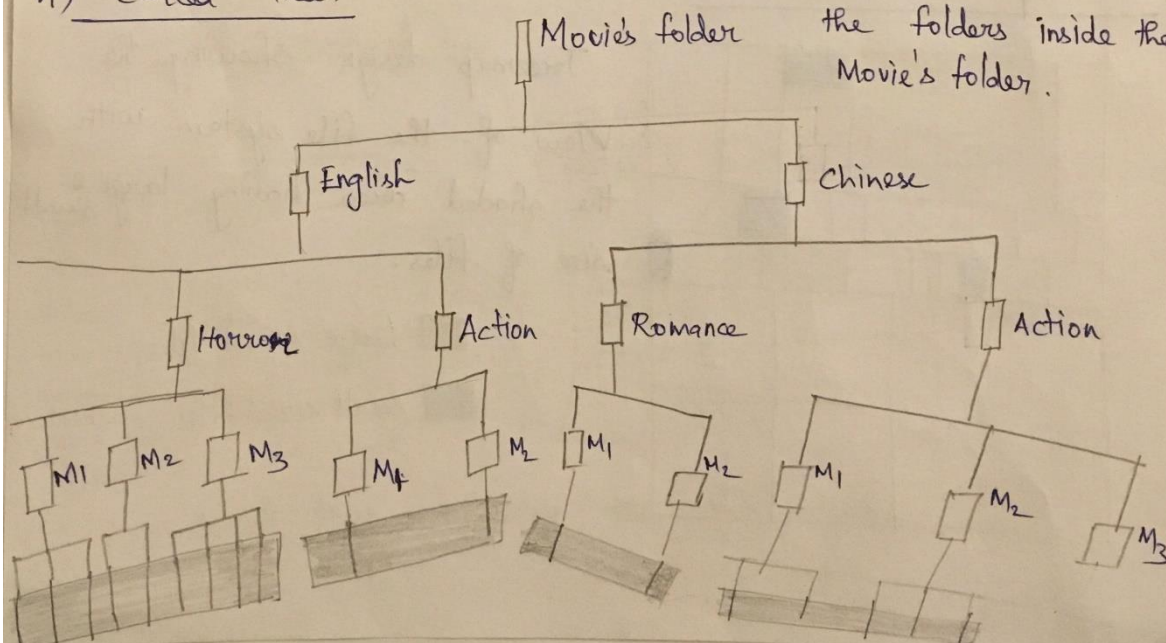

Small sized files

3) Non-Orthogonal Planar Straight line grid:

Graph showing 4 different file formats (PDF, Docs, images, MP3) and based on the count of files in the folder, the branches are drawn.

4) Curled Tree:

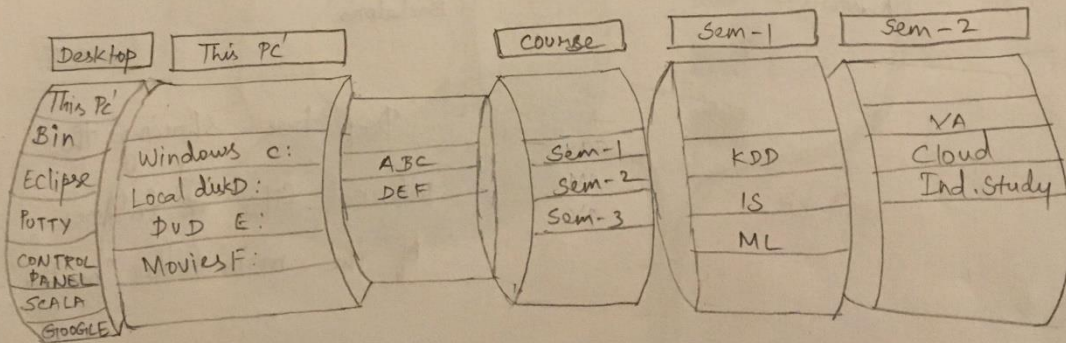

Curled tree showing the folders inside the Movie's folder.

5) Elastic Hierarchies

Elastic hierarchies showing the files structured through its size range & finally visualizing specific size files.

6) Collapsible cylindrical tree.

Cylindrical tree showing the file system.

7) 3-D Tree:

8) Deep Tree:

7) Hexagonal Tiling:

 .MOV
 .PDF
 .doc

 .MP3
 .xml
 .py

 .txt
 .html

Hexagonal tiling showing the file system of various file types

10) Ordered Sunburst:

Ordered sunburst graph showing the percentage of files in each file system (C:, D:, E:, F:)

 C:

 D:

 E:

 F:

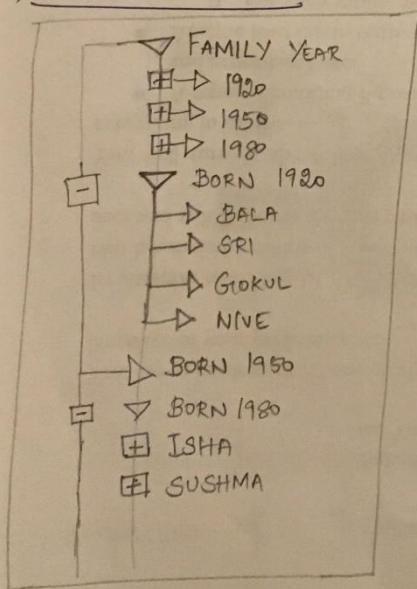

2) Family tree structure :

1) Interactive Exploration - Space Tree :

Space tree showing
the family structure

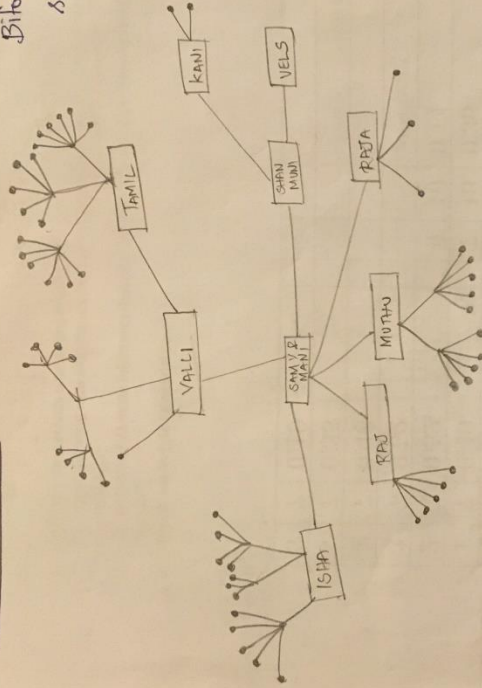

2) Smart tree :

Smart tree showing the family members
born on the specific years.

3) Bifocal Tree:

Bifocal tree
showing the
family structure

4) Polar Treemap:

Polar treemap showing the family entirely which
comprises of 7 families.

5) Castles :

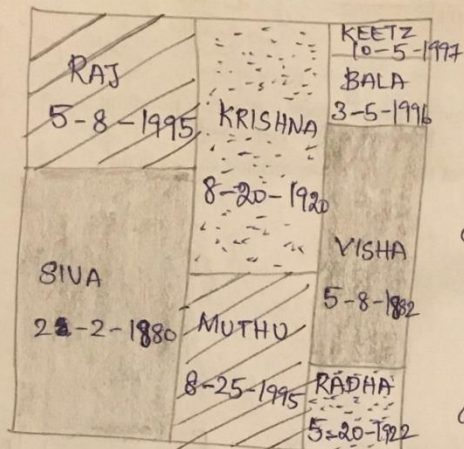

Castles graph showing different family members in ~~differs~~ many dimensions.

6) ~~Shamsah~~ Shamsah tree:

Shamsah tree showing the layers of hierarchy which follows year of birth. Inner circle is 1890. Second circle is 1920. Third is 1950. Fourth is 1980.

7) Columnar Tree map:

Columnar tree map showing the family members along with their date of birth. The sections which have the same shade are couples. The size of the rectangle varies according to ~~the~~ their of birth.

8) Hexagonal Tiling:

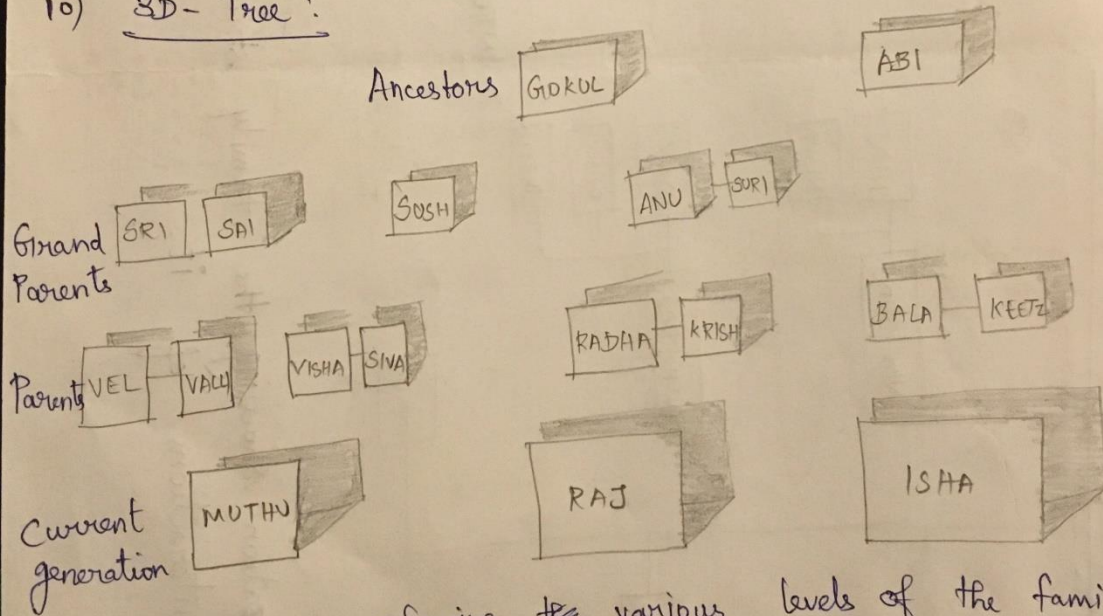

Hexagonal tiling showing the year of birth with wise family groups in my entire family.

9) Equal Height Treemap:

Equal height treemap showing the family member name and their month & year of birth.

10) 3D-Tree :

3-D tree showing the various levels of the family tree from ancestors to current generation.

Visualization

AND INTERACTIONS

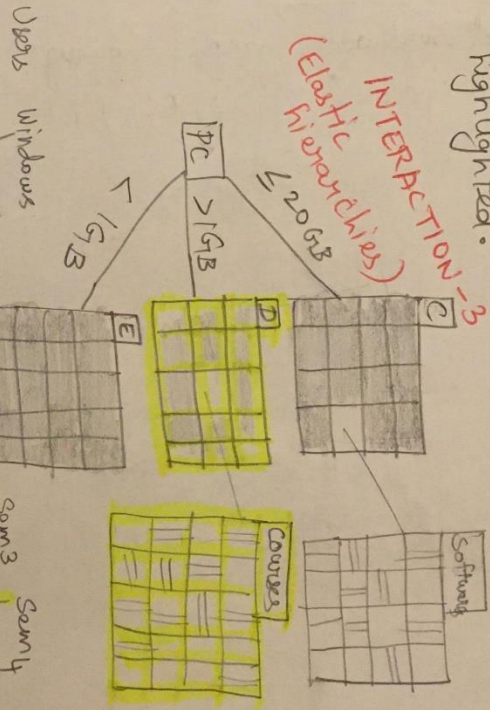

One visualization, 4 interactions.

If D: is selected, then in the remaining 4 designs, the data related to D: will get highlighted.

INTERACTION-1 (Scaffold Tree)

INTERACTION-3 (Elastic Hierarchies)

INTERACTION-2 (Collapsible cylindrical tree)

INTERACTION-4 (Deep Tree)
